

Welcome to the Chippewa Falls Rotary Club. Our web site is our primary way to share club and member information. The following is the procedure for logging into the membership portion of our web site to see information about other members, get a current email list, and make changes and additions to your information.

Please log into our Rotary Club website at <http://chippewafallsrotary.org/>. Your name must appear on our members page on our main web site for you to log in.

Go to member login at the upper right corner of the page and click on it.

Enter your user name which is the first letter of your first name and your last name (example: dcrane).

If you have not been given a special password then contact David Crane or use the procedure below. Once in please change the password to something you can remember. You can also click on the "Forgot your password?" to get a new password. You will get two emails with the second one containing your login information.

In the upper right corner of the page now click on "Your profile". Please update all of your information on the edit profile page. Always keep your email address current under "Email Settings". Please do not change your screen name or username. You do not have to enter your year of birth. You can look at other member's information to get an idea about the bio.

Also in the upper right corner of the page is the "Memberlist". Click here to see each member's information, email, and web site address. If you click on "Show a list of all members' email addresses" you will get a list you can copy and paste into your email client to mail to everyone in the club. Be sure to use the blind copy in your address line or all the names will spill across the top of your letter.

The information on the public part of our web site is taken from the private member information. Please email ([crane@dentsem.com](mailto:crane@dentsem.com)) or give to David Crane a current photo that can be used on the web site. Call or email David for help.

Thank you.
